

## DCAA INCURRED COST SUBMISSION

### MORE INFO

*Where can I get the latest ICE model?*

*Go to <http://dcaa.mil> to download the latest ICE model with instructions and examples!*

What is a DCAA Incurred Cost Submission, otherwise known as a DCAA ICE (Incurred Cost Electronically) Model?

An Incurred Cost Submission is an annual submission required six months after the end of the contractor fiscal year. The ICE shows summaries of contractor financial statements and other accounting records to compute indirect rates, direct costs by contract, and indirect costs by pool including unallowable costs.

The ICE model is a spreadsheet developed by DCAA for contractors to complete and submit their rates and other information. The latest ICE model came out in 2008 and contains more links and schedules than previous versions. Information about the Incurred Cost Submission is included in *DCAA Information for Contractors*.
